Design Tools

Figma
Spline
Fusion 360
Godot
Adobe Illustrator
Adobe Photoshop
HTML / CSS / JavaScript
Python

Skills

Systems Thinking
Hardware Prototyping
UX Research
Inclusive Design
Community-Centered Design
3D Modeling & Fabrication

Education

North Seattle College - GPA 3.41
AA - Anticipated June 2026

Code Fellows
Full Stack JavaScript
Sept 2022 – Feb 2023

Awards

Best Research in Engineering PNW LSAMP · Oregon State · 2025

NASA Space Grant Scholar North Seattle College · 2025

Deep Submergence Insignia US Navy · 2022

Submarine Warfare Insignia US Navy · 2022

Leadership

Founder & President · SEDS NSC Space Club 2024–2025
Co-Leader · Queer Trans-Cooperative 2024–2026

NASA Eclipse Ambassador 2024

Zoe Unica Solaris

Interaction Designer

Featured Project

HUSK-E | UW IxD Application Project 2026

A paired handheld device that uses creature-raising mechanics and mutual reciprocity to build platonic friendship between college students in large lecture classes.

· Designed full UX flow, state engine, and settings architecture in FigJam
· Engineered hardware spec under $20/unit using ESP32-S3, NFC, haptics
· Produced 3D technical drawings in Fusion 360 and rendered in Spline
· Developed faculty integration system for classroom deployment

Experience

Student Body Vice President
North Seattle College · June 2025 – Present

· Applied systems thinking and inclusive governance to shape policy for 5,000 students
· Led community-centered initiatives around belonging, safety, and equitable access
· Designed and managed communications strategy ensuring marginalized identities are centered, not tokenized

Undergraduate Researcher | Award Winning
University of Washington · June – August 2024

· Designed material patterns for thermal efficiency using h-BN, Graphene, and $MoTe_2$ bridging visual patterning and material science
· Presented research at SACNAS National Science Conference
· Recognized for innovation in material design techniques

3D Printing & Modeling Intern
STEMTAC Foundation · Jan – June 2024

· Designed and fabricated 3D models in Fusion 360 and Autodesk Inventor for underserved community applications
· Delivered printable housing concept prototype in 3 months
· Applied ML tools (Roboflow, OpenFace) for data visualization

IT Systems · United States Navy | Submarines
Jan 2019 – June 2022

· Operated and maintained mission-critical systems under extreme constraints, high-stakes human factors environment
· Managed Linux/Windows infrastructure for classified networks
· Earned Submarine Warfare + Deep Submergence Insignia
